**To the Treasurer of the
European Crystallographic Association**

Subject: Short report on the To.Sc.AI'And Workshop, co-sponsored by ECA.

Dear Colleague,

it is a great pleasure to inform you, also on behalf of the other co-organizers, that the Workshop on *Total Scattering for Nanotechnology*, entitled **To.Sc.AI'And**, held in Granada (Spain) in September, was a great success and has benefited from the presence (in person!) of 58 attendees (speakers, sponsors and regular participants). The entire list of participants is supplied, for your convenience, in the attached pdf file.

I also inform you that the generous funding from ECA has been used to provide support to distant participants, in the form of full accommodation at the Hotel Luna to four young attendees: Maksim Plekhanov (Russia), Iryna Protsak (Ukraine), Raquel de Benito Muñoz (UK) and Baiyu Wang (Denmark).

On behalf of everybody, I heartily thank ECA for the support which enabled the participation of these young attendees and remain at your disposal for further questions.

Sincerely Yours

Norberto Masciocchi, Prof.
